SUMMARY

AWS Certified technology quality and risk professional with four years assuring payment-security and central bank digital currency (CBDC) systems for clients on four continents. Leads client test programmes to go/no-go sign-off, automates at scale (98% of a 1,222-case HSM suite) and turns results into executive decisions; portfolio work in IT audit and delivery.

EXPERIENCE

IDEMIA Technologies Indonesia **Jakarta, Indonesia**

Global provider of identity, payment and cryptographic security technology

Test Lead, *Central Bank Digital Currency Programme (client in Malawi)* *Jun 2026 – Present*

- Lead end-to-end testing for a central bank's CBDC customer-service deployment, owning test strategy, entry/exit criteria, execution and release sign-off.
- Direct a team of 2 mobile and web testers and act as primary quality contact for client stakeholders, reporting quality status, defect trends and release risks to support go/no-go decisions.

Senior Automation SDET, *Hardware Security Module (HSM) product, concurrent role* *Aug 2026 – Present*

- Develop and maintain Python automation in Jenkins CI covering 98% of the HSM test suite (1,200 of 1,222 test cases), keeping 22 hardware-dependent cases manual by design.
- Own the majority of regression and non-regression cycles, designing test cases directly from cryptographic functional specifications.

Software Development Engineer in Test *Sep 2023 – Jun 2026*

- Built the team's test automation framework and moved it from TDD to BDD so business and client stakeholders can read the scenarios; mentored and onboarded 3+ new QA engineers on it.
- Tested CBDC mobile banking applications on iOS, Android and web with international central banks, including the Bank of Canada and the Bank of Israel, verifying compliance with banking standards.
- Cut manual test reporting effort by 40% by automating the import of Jenkins results into Jira test executions with the DevOps team, giving end-to-end traceability.
- Reduced post-release defects by 20% by leading regression testing for PCOM smart-card software.
- Raised test coverage and efficiency by 25% by developing Python test scripts for eUICC 5G SUCI subscriber-privacy features.

PT Advotics Teknologi Global **Jakarta, Indonesia**

Software Testing Engineer *Dec 2022 – Jun 2023*

- Reduced testing time by 30% by building Selenium UI and Postman API test automation for web applications.
- Validated data integrity through API and MySQL database testing; maintained test plans, cases and reports in Jira across Scrum sprints.

SELECTED PROJECTS

Arunika Bank Payment Security Case Study *(independent; simulated bank, six roles, CI-built dashboards)* **2026**

- **IT audit:** tested 11 IT general controls over SAP S/4HANA, an HSM console and Active Directory on the full population of 185 records, mapping findings to COBIT 2019 and ISO/IEC 27001:2022.
- **Consulting:** ran a COBIT-aligned IT maturity assessment across eight domains with stakeholder scoring, impact-weighted gaps and a 24-month roadmap.
- **Delivery:** built earned-value (CPI/SPI) status reporting with a RAID log, and a BRD-to-test traceability matrix linking 14 requirements to live test results.
- **SAP and security:** analysed procure-to-pay on SAP MM/FI tables, flagging 11 exceptions (duplicate invoices, maverick buying, split POs); wrote 59 API security tests against the OWASP API Top 10.

EDUCATION

Politeknik STMI Jakarta **Jakarta, Indonesia**

Bachelor of Applied Science (Sarjana Terapan), Information Systems; *GPA 3.82/4.00, Summa Cum Laude* *Aug 2018 – Dec 2022*

- Led development and testing of the Wanda FLP customer engagement app for PT Cheger Motor.

CERTIFICATIONS, SKILLS & INTERESTS

Certifications: AWS Certified Cloud Practitioner; BNSP Certified IS Business Analyst (2022); Google Data Analytics (2022); Dicoding Python Programming, Data Visualization (2022); HackerRank SQL (2022)

Technical: Python, SQL (MySQL, SQL Server), pytest, Selenium, Playwright, Postman, Jenkins, GitHub Actions, Git, Jira, ETL testing, AI-assisted testing

Domain: test strategy, release readiness, IT general controls, COBIT 2019, ISO/IEC 27001, OWASP API Security, earned value, SAP procure-to-pay, payment security (HSM, CBDC, eUICC)

Languages: Indonesian (native), English (professional working) • **Interests:** AI in assurance, data analytics, machine learning
